REPORT

Order 3300096
Sample no. 108362

According to the extent of the analysis the sample complies with the requirements of Warning values of the DGHM (Deutschen Gesellschaft für Hygiene und Mikrobiologie) “Published microbiological guideline and warning values for the evaluation of food” in the currently valid version..

Remark to Escherichia coli:

According to the National Footnote, these are presumptively determined β -glucuronidase-positive Escherichia coli.

Remark to Staphylococcus, coagulase-positive:

Results below 150 cfu/g are considered as estimates.

Remark to Salmonella spp.:

In the testing of Salmonella spp. according to ISO 6579-1 Salmonella Typhi and Salmonella Paratyphi are not included. These bacteria/germs are hardly found in food. If on the side of the customer there is a justified case of suspicion these two subspecies can be analysed by a PCR test, which needs to be ordered separately by the customer. In case of positive Salmonella results a confirmation of Salmonella spp. was conducted by MALDI-TOF (database BDAL/7311 MSPS).

Remarks

The microbiological evaluation is based on the guideline and warning values of the German Society for Hygiene and Microbiology (DGHM) for herbs and spices, 2018.

Start of testing: 25.08.2023

End of testing: 04.09.2023

1) The maximum level applies to the food supplements as sold.

Explanation: The symbol "<" or n.q. in the result column means, the parameter concerned is not quantifiable at the limit of quantification shown opposite.

Parameter-specific analytical measurement uncertainties and information regarding the method of calculation will be provided upon request if the reported results are above the parameter-specific limit of quantification.

VO (EU) 2023/915: Commission Regulation (EU) 2023/915 of 25 April 2023 on maximum levels for certain contaminants in food, in version currently in force.

Explanation: OM = on original matter; DM = on dry matter base

According to the extent of the analysis the sample complies with the requirements of Commission Regulation (EU) 2023/915 of 25 April 2023 on maximum levels for certain contaminants in food, in version currently in force..

Remarks

For Ashwaghandha powder no maximum levels for heavy metals are defined. Therefore, the maximum levels for food supplements are displayed. A maximum level for arsenic is not defined for food supplements.
